

# Mark P. Dykstra

Des Moines, IA

## EXPERIENCE

- Configuration Tech:** Zones Inc, Carol Stream, IL June-July 2016  
Configured computers and other devices for clients such as Costco, Nike, and Google.
- Wordpress Developer:** Fermilab, Batavia, IL Summer 2015  
Made the Wordpress visual editor more useful for site admins to create pages in the Fermi style with PHP, CSS, and Javascript modifications to the theme.
- Software Quality Assurance Engineer:** Fermilab, Batavia, IL Summer 2014  
Automated integration testing for the LArSoft project with Bash and Python scripts.
- Data Acquisition Engineer:** Fermilab, Batavia, IL Summer 2013  
Wired and programmed sensors using the NI CompactRIO and LabView.
- Computer Repair Technician:** Dordt College, Sioux Center, IA Fall 2012  
Fixed hardware and software issues with other students' computers.
- Sharepoint Developer:** Fermilab, Batavia, IL Summer 2012  
Migrated existing sites into Sharepoint and implemented features into Sharepoint with Javascript.

## EDUCATION

- Bachelor of Arts Degree May 2016  
Dordt College, Sioux Center, IA GPA 2.83 on a 4.0 scale  
Major: Computer Science (Hardware Emphasis)

## ABOUT ME

I have a passion for making things, whether they be robots, videos, games, or websites. You can see a few of the things I've made on my website, [droidfreak36.com](http://droidfreak36.com).

I've been teaching myself coding since 2008, and have picked up quite a few languages along the way. For example:

- HTML/CSS
- Javascript
- PHP
- C++
- Java
- LabVIEW
- Python
- Lua
- Bash

I'm able to learn new languages quickly – for example, it took me just one week to go from absolutely no GML experience to recreating a complete Hannah and Pirate Caves level in Game Maker: Studio.
